

# Highlights of initial quantitative analysis of survey responses

- There have been 88 responses representing 104 people (to date).
  - By age: 20–39 (9 responses); 40–59 (10 responses); 60+ (69 responses)
- Responses (multiple choice) were analysed by age group.
  - No analysis of “Other” or freeform comments at this initial stage. These have been considered but not included here. They will be included in the workshop analysis to be done in the near future.
- What were the common interests and “passions” of the congregation? Knowing this will help guide us as we “go forward with purpose.”
  - Show the responses selected by 67% or more of respondents in at least one age group.

	20 - 39	40 - 59	60+

# Detailed results for each question

70% threshold is highlighted for comparison

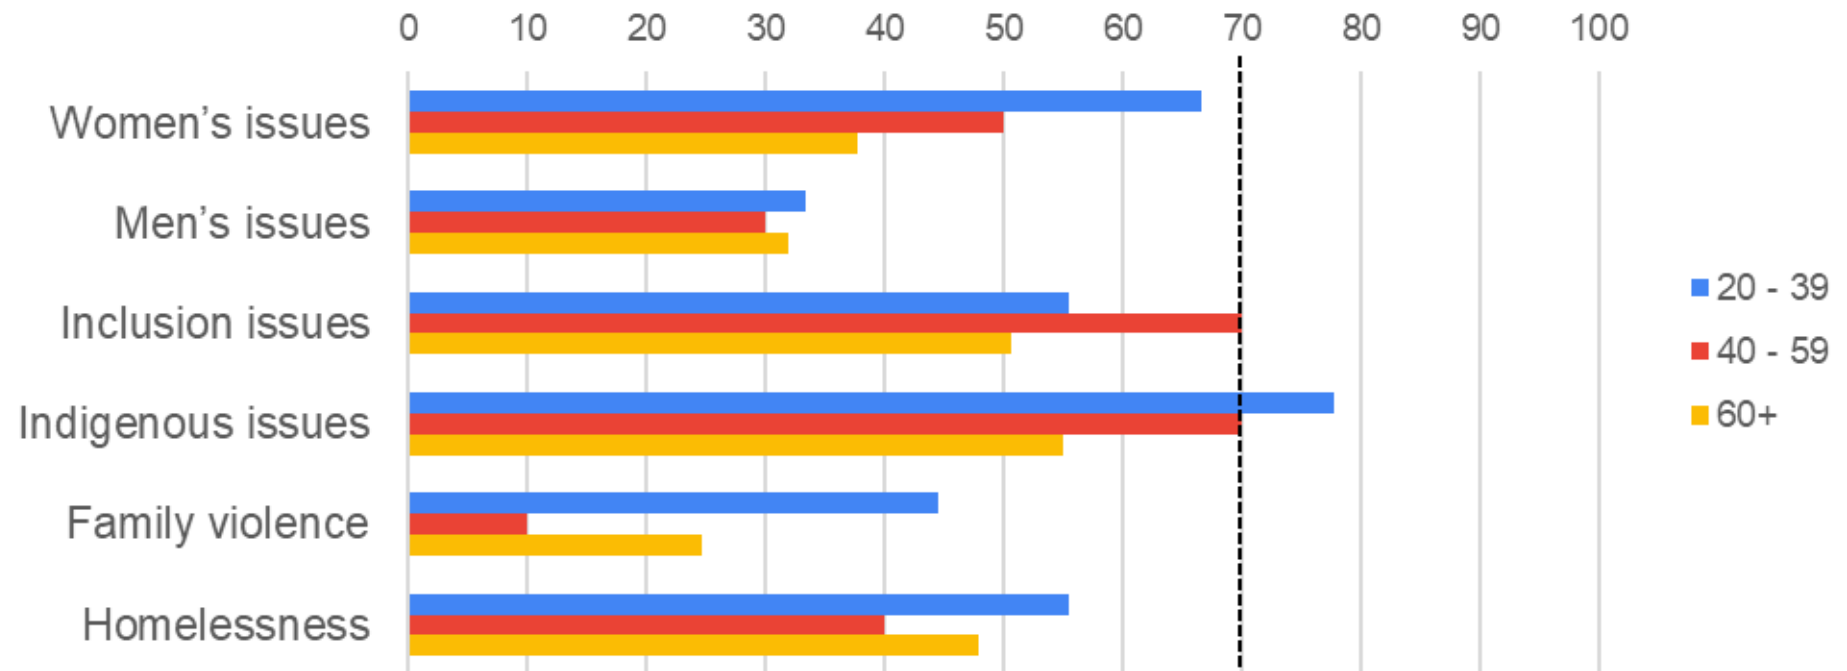

We are considering the need for a new logo and the survey results will help in determining what that will be. The majority of respondents (67% overall) liked what was proposed. However, all comments received need to be and will be considered before making any recommendation to Council and the Congregation.
