3D Tree: Mustard Seed Craft

You will need:

- 2 tree pieces printed on cardboard
- brown crayon
- green paper
- scissors, glue sticks

What to do:

- Colour the tree trunks if they aren't printed on brown cardboard.
- Cut the slits in the tree trunks: one from the top to the middle, the other from the base to the middle.
- Slot the tree trunks together.

- Cut leaves from the green paper and glue to the branches.
- Cut out birds and other small creatures that find shelter in trees and glue them onto the branches.

If you can't print the tree template use a branch from the garden to make your tree. Fill a pot with soil and 'plant' it.
